Roadmap proj-devsys

Contents

1   :arch

1.1   adapter / facade

systems :: subsystems

```
configured standard software
facade: api front, api back
```

front-api types:

```
KATALOG
KONTAKT
```

project specific:

```
TEAM
VERTRIEB (specific configuration: assembly)
MULTISHOP
LOGISITK
```

management cockpit & administration

```
KENNZAHL
KONFIGURATOR
VERWALTUNG
```

1.2   dokumentation map system-names :symbolic to runtime systems

```
(virtualized) || (subsystem software                || (symbolized)   ||
                  package/components)

s0:8000      || ase-sms-back                         || sms-back-dev.base.wolfspool.at
s1:8002      || falcon server /notes -> rethinkdb    || rcs2_wc.webhooks.devsys.wolfspool.at
```

1.2.1   webhooks in woocommerce:

```
table: wp_post_meta
filter: meta_key='_delivery_url'
```

1.2.2 devsys rcs2 prototyping & interactive sessions:

1.2.2.1 system access point:

```
host: rcs2_wc.webhooks.devsys.base.wolfspool.at
path: /notes
```

```
  mapped in nginx/default
  to s1:8002
  running Falcon Server
  in virtualenv.d/env_pypy
```
